

ASTC Products

800 Series Urethane/Polyurea, Bond Seal adhesive, adhesive sealer cartridge applied –Seamless Floors

800 Bond Seal - Self leveling, 10 minute set *All 800 Series is may be sanded and painted

830 Bond Seal – *Vertical*, set time varies Standard product 830-240/360 4 to 6 minutes

1000 Series Penatron Polyurea spray, AROMATIC, two-component

1006 - Long open time, multiple uses 6 minute open time

1007 - High elongation polyurea, abrasion resistance and high chemical resistance

1008 EX – Aliphatic Polyurea Spray, fast set time 5 to 15 seconds

3000 Series Penatron Polyurea Control joint & Expansion Joint slow polyurea

3003 - Control joints and inductive loops, self -leveling, cold applications, duplex cartridges, machine dispense or hand mix

3003 C – High End Polyurea for Clean Room applications

3004 - Control joints, multiple harnesses. Shore A 85, rapid set, flexible, below zero, USDA

3246 - Expansion joints, Airfields, Bridges, mil specs ES-SS200 & FAA P605, self-leveling low durometer 30-40 Shore A, 600% elongation

4000 Series Penatron polyurea and urethane rapid repair materials, two components

4034 - Aromatic very rapid set, very high strength, concrete, rigid, below zero, 10 minute drive-over, ultra-low viscosity

4038 - Aliphatic quick set, cartridge dispensed crack repair, may be polished and top coated

5000 Series polyurea roll down, heavy duty aliphatic top coat, two part clear & pigmented

5500 - Aliphatic Polyurea, 5500EX extended set time, high solids polyurea/polyaspartic, clear or pigmented – one day application system with pigment 5500 base coat & clear top coat

5800 -100% Solids Aliphatic Polyurea, clear long open time, no odor, interior office, kitchens, medical areas, food packaging

5100 – Aliphatic Urethane/polyurea hybrid single component, matt or high gloss, water reducible

6000 Series Epoxy Airfield & Industrial/Commercial

6009 – 100% solids, Commercial/Industrial Floors two versions, two set times, pigments available

6012-2F - 100% solids, fast set, clear (NP), pigmented, winter grade, primer, grout, coating, “advanced curing system” high fuel resistant, airfield light anchor, anti-corrosion

6012-2S - 100% solids, slow set, clear (NP) and gray, summer grade, primer, grout, coating, “advanced curing system” slow set summer use

6014 – 100% solids Nova Bar chemical resistant barrier, tank, floor and equipment coating

7000 Series urethane. Industrial Primer For Polyurea, Urethane & Epoxy

7001 - Penprime 7001, single component urethane, quick set, highly adhesive primer - for cool conditions accelerated set available

8000 Series Moisture Vapor barrier - 8000

8000 CMW – Permanent moisture vapor reduction Concrete industrial floors, walls, densifier prior to floor coatings, secondary containment polyurea spray applications, used with Penprime, protects against freeze/thaw cycles

8001 Aqua Bar – Water Repellant for concrete surfaces

Equipment and Tools

1:1 LS joint application pump, cartridges, electric duplex guns, manual guns, Static mixers, support items, call ASTC for details
